

ABC Corp™ Secure since 1795

ABCORP IS A WORLD CLASS CORPORATION WITH A HISTORY THAT IS ALMOST AS OLD AS AMERICA ITSELF, DATING BACK TO 1795.

Faced with the difficult challenge of managing a multi-national, multi-entity, multi-currency corporation, ABCorp reached out to Synergy Resources and the Synergy Strategic Business Services Group to help design a scalable foundation that would support the corporation's future growth needs.

The [Synergy Strategic Business Services Group](#) immediately helped to bring visibility to our company's strengths and weaknesses through a series of business process mapping sessions. Together, our companies effectively prioritized the improvement opportunities identified during these mapping sessions and established a plan to move forward.

The Synergy Team then worked closely with our company to re-engineer critical processes while concurrently installing and configuring a multi-national, multi-entity, multi-currency ERP system to support all the ABCorp locations.

The [Infor Visual Manufacturing ERP](#) system, in combination with [Synergy's ERP Extension Tools](#) were then used to train our employees on the new processes and conduct a series of pilot tests to develop our expertise with both the newly engineered processes and the software's features and functions.

The Synergy team's extensive knowledge and experience in manufacturing, finance, continuous improvement and change management were instrumental in our companies achieved success.

[Synergy's Technical Support Team](#) provided expertise in supporting data migration and programming needs during the project and helped to solve several complex problems throughout the journey.

All our locations, World-Wide, are now operating in a single Visual Manufacturing database, with multi-site, multi-entity, multi-currency capability and we are rapidly turning our attentions to strengthening our quality systems and look to our strong partnership with the Synergy team to support our goals and help us achieve our business objectives.

WRITTEN BY JACQUELINE WILLIAMS CHIEF TECHNOLOGY OFFICER, ABCORP

ABCorp is a World-Class company with corporate offices in Stamford, CT and locations in the USA, Canada, Australia and New Zealand. From our origins as one of the first companies to print currency for the United States to our role today as a leading provider of critical products, documents and services for the financial market, ABCorp is an experienced and trusted partner. Today, we offer a wide variety of products and services such as secure documents, EMV and contactless payment credit and debit cards, instant issuance programs (identification and payment), and sophisticated digital and contactless solutions including mobile payments.
