

# Shipper Connect

*Seamlessly integrate UPS/FedEX/  
USPS shipping from within VISUAL*  
dynamic invoicing // real time data import & export

 **SYNERGY** | ERP EXTENSIONS

## Control & efficiency

Synergy Resources offers and supports a product that provides an interface between VISUAL and UPS WorldShip®, FedEx Ship Manager® and USPS. This integration gives you the ability to eliminate manual entry into VISUAL of the tracking numbers, shipment costs, shipping weights, and other information in UPS WorldShip, FedEx and USPS. Using this tool, you can track shipments directly from VISUAL.

The integration is a seamless interface. Using this tool, your shipping department only needs to enter a VISUAL Packlist ID, generated from

Shipping Entry. After that Packlist ID is entered, all corresponding shipping information is pulled into the Shipping system for shipment processing. All shipment information is pulled directly from your SQL Server database to Shipping system with no other middleware in between.

## Revision Control

**Streamlined Work flow** // Track all shipments from within VISUAL, eliminating the need to use other systems.

**Eliminate Redundant Data Entry** // Enter a Packlist ID in VISUAL and all corresponding shipping information is pulled into the Shipping system.

**Improve Tracking Accuracy //**

Eliminate manual entry of tracking numbers, shipment cost, and shipment weight.

**Accurate Data //**

The Report Launchpad tracks revisions, ensuring that you always have the most current and accurate data.

**Customizable to Meet Your Needs //**

Shipper Connect can be customized to match the needs of your business.

**Tighter Security //**

The Report Launchpad tracks revisions, ensuring that you always have the most current and accurate data

**Getting to your data is easy, fast, secure, and reliable**

**Dynamic Tracking //** Track shipments from Order Entry, Order Management, Shipment Entry, and VISUAL CRM.

**Dynamic invoicing //** Actual freight costs can be added to your Packlist before it is invoiced.

**Worldship Import from Visual //** Allows the availability to import into the Shipping system per packlist the following information // Customer Name and Customer ID // Full Shipping Address // Phone, fax, and email address // Shipment type // Order ID // Customer PO // Packlist ID

**Worldship Export to VISUAL //** The following information can be sent back to your database from the Shipping system // Packlist ID // Order ID // Tracking Number // Freight Cost // Ship Date // UPS Void flag // Actual Shipping Weight

**Do you know where your shipment is?**

Shipper Connect can show you exactly where.
