

VISUAL Manufacturing User Group Testimonials

As a loyal VISUAL user and a repeat User Group attendee we need your assistance in getting other VISUAL users interested in attending the User Group meetings. Are you willing to provide a testimonial about the benefits you receive from attending the User Group meetings? If so, please write your testimonial below including your name, your company name and the date. If you'd rather send an email testimonial, please [click here](#) or email MShannahan@SynergyResources.net. We appreciate your support!

A spiral-bound notepad with a silver pen resting on it. The pen has the SYNERGY logo on it.

"With the help of our vendor partner Synergy Resources through the ERP selection process, piloting, going live and continuously improving, we have total visibility, reporting and information sharing capabilities of Infor Visual Manufacturing that dramatically improved our business. Eliminating physical inventories, reducing lead times, easily keeping costing and pricing up to date, streamlining and controlling engineering changes and custom reporting are just some of the advantages we gained with Visual over our previous system."

"From the beginning, we were strongly encouraged to attend User Group meetings to network, share ideas, get answers and contribute to conversations regarding Visual, and we have been members of VMNEUG since before we went live with the system in 2009. The opportunity to connect between expert users of all disciplines, Infor, Synergy, and other vendor partners directly at a very reasonable cost has helped us not only to have a good avenue to improve and learn, but also to give back to new users and encourage those potential Infor / Synergy customers through Q&A sessions, system enhancements, presentations and group discussion."
