## **Throughput Improvement Workshop Agenda:**

How do you leverage the concept of Throughput in any functional area to improve the holistic financial and operational performance of your company?

In this workshop there will be something for everyone in any functional area of your Manufacturing company to learn and take back to improve the overall business performance of your company.

In this content-packed 3-hour Workshop you will learn:

- What is Throughput and why should I care?
- What is Throughput Accounting?
- What do Financial Statements based on Throughput Accounting look like?
- Scheduling and Throughput – How are they related?
- What are different types of Scheduling available to VISUAL users?
- What is the relative impact of Throughput of each?
- How do I use VISUAL or related tools to make a direct impact on my company's Throughput?
- Where do I start? Which concept should I introduce at my company first?

For people in:

- Engineering
  - Sales / Customer Service
  - Finance / Accounting
  - Production / Planning
  - C-Level / Company Stakeholders
- 
- Case Studies
  - Sample Reports
  - Where to find Throughput related information in VISUAL
