

# Support tool for ERP

## Realtime Information ERP

### Track Performance

 **SYNERGY** | ERP EXTENSIONS

### *Interactive, real-time, decision-support tool for your ERP*

See, analyze, and track, real time information that helps you support individual/departmental metrics and goals.

### How would you like to see, analyze and track your company's performance metrics and goals, all at the click of the mouse?

SmartViews allows you to see, analyze, and proactively make decisions to any information, in any area of your company.

For example, what would your internal Supply Chain Manager want to have at his or her fingertips?

### On Time Delivery & Inventory Turns Metrics?

Picture this, SmartViews will easily monitor penetration of raw and FG Inventory levels, in real time, showing which parts have the greatest risk of stocking out. Proactive management.

### How about the Production Manager/Supervisor?

Manufacturing schedules are dynamic, changing rapidly because of customer changes, defects, absent employees, etc.

### *What if they could access Revenue & On-Time Delivery data real time, and immediately?*

What if they were able to quickly change the work order priority and immediately communicate changes electronically through to the shop floor?

## SYNERGY SMARTVIEWS

*What if they were able to quickly change the work order priority and immediately communicate changes electronically through to the shop floor?*

### Then there is the OPERATIONS MANAGER

Who is pulling their hair out trying to meet your growth objectives? What if they could access Revenue & On-Time Delivery data real time, and immediately? They could make proactive decisions, maximizing enterprise benefits couldn't they?

### Don't forget the QA Manager.

Which products lines and parts have the greatest failures? Supplier and Customer returns data? Or Supplier or Product quality ratings?

All regulatory compliance data and more is available at the click of a button with Smartviews.

### Optional SmartViews Scheduler

Take any of your reports and views and set them on a timer to automatically email them out. Reports go out as a PDF attachment and views go out as Excel attachments. Easily setup your schedule to accommodate almost any need.
