SYNERGY
DRIVING INDUSTRY FORWARD

The Right Shop Floor Visibility – Right Now

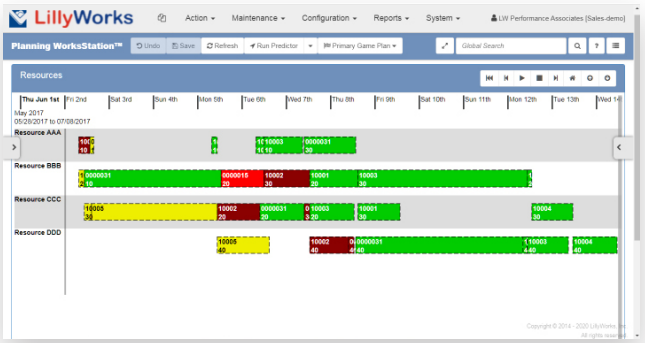
Graphicast INC.

"Yeah, we've got the capacity to add that in. If the customer asks, 'Can you pull my job in four weeks?' then we can test it. The Predictor can tell us if we're disrupting the rest of the system." - **Val Zanchuck,** Graphicast

Protected Flow
MANUFACTURING™
by LillyWorks

Stop Struggling with Scheduling and Material Planning

Protected Flow Manufacturing™ (PFM) is a revolutionary production management system that helps you drastically improve the flow of information and materials and increase the speed of execution in your shop.



Protected Flow Manufacturing can help you:

Gain the visibility you need

Increase shop floor productivity and promote better flow by bringing actionable intelligence to those closest to the work.

Prioritize based on how you work

PFM is the *only* solution that accounts for shop floor variability by adjusting priorities based on real-time conditions.

Predict a better future

Simulate how you'll execute jobs at each future moment to identify and prevent obstacles from derailing production.

Get the results you need, *fast*

Customize PFM to how you manage production today — as a standalone solution or integrated with an existing ERP.

SATURN INDUSTRIES

"We have much better control of the production floor, the backlog is shrinking, and we're not hearing from customers quite as frequently asking about their orders. Best of all, we're keeping our promises!"

– Cory Lee, Saturn Industries, Inc.
