# Latitude Manifest and Shipping System

User-friendly parcel shipping integration software for getting product to customers quickly, securely and affordably. [Latitude Manifest & Shipping System](#) provides a seamless multi-carrier shipping solution that integrates with more than 20 different ERPs, including Infor VISUAL.

See how Synergy Resources and Latitude Manifest and Shipping System can simplify your small parcel and LTL shipping and package tracking.

## Bestway Shipping

Automatically select the best carrier shipping method based on cost, transit time or weight – including international options.

## Highly Customizable

Simplify shipping and package tracking by leveraging many years of experience developing tailored solutions.

## International Shipping

Certified for international shipping for both US and Canadian origins with automatic generation of all appropriate paperwork.

## Rules-based Rate and Handling Charges Engine

Always provide proper freight billing to your end customers by staying up to date with the latest carrier service offerings.

## Hazmat Shipping

Classify hazardous products and then print the required documentation and labels according to specifications, every time.

## e-Fulfillment

Ship packages as if they come directly from your e-Commerce partners, not your facility.

## Pick Ticket Creation

Review, allocate and create pick tickets for orders needing to be picked, packed and shipped with ease.

## Pick/Pack

This feature verifies the correct items have been picked. It tracks items and quantities to the actual carton and carrier tracking number. You'll always know which items were shipped and the box they were in.

## Labeling

Easily generate/print item, carton, and bag, etc. at the point of packing.

## Email Notification

Send tracking information via email notification with a trackable link to let your customers know their package is on its way and when to expect it.

## Ongoing Updates and Upgrades

Our experienced engineering team prides itself on diligently staying current with new features, advancements and required carrier updates.
