AMERICANEAGLE.COM & SYNERGY RESOURCES

Complete Ecommerce Solution for VISUAL ERP

Americaneagle.com and Synergy Resources are teaming up to provide a real-time integration between your back-office software (VISUAL ERP) and your customer-facing ecommerce stores. This integration utilizes a web service layer between the two applications. The Magento platform has a built-in REST/SOAP API, allowing VISUAL ERP to be configured to push data directly into Magento. Using Synergy Resources' VISUAL Business Objects and SOAP API Magento can be configured to push data directly to VISUAL ERP. The transactions are fully secured and encrypted using an HTTPS connection. Since the integration is using web services, the Magento ecommerce platform and VISUAL ERP instances can be hosted in completely separate networks.

## "OUT OF THE BOX" INTEGRATION BETWEEN MAGENTO & VISUAL ERP
