Visual Vendor Portals
Accelerate & extend your supply chain performance

web-based vendor portals
dynamic order tracking & updating

SYNERGY | ERP EXTENSIONS

Improve quality through better communication

Today, many companies are looking to improve their business with the ability to increase vendor performance with vendor portals.

In today's supply chain, vendor portals are becoming a competitive necessity to increase time to market. Vendor portals can also decrease costs and improve quality through better communication.

Designed especially for VISUAL users who want to offer online vendor management instantly, vendor portals provide a direct, interactive interface between you and your suppliers. Fully integrated with VISUAL, vendor portals offer real-time online order tracking and item information to suppliers 24 hours a day.

Your company's information at your fingertips

Increase Vendor Performance // Gain valuable visibility into vendor activity & performance data.

Reduce Operation Costs // A portal solution reduces paperwork and processing efforts. It also improves order accuracy, which improves customer satisfaction and reduces the number of costly returns.

Enhance Vendor Service // Vendors can respond to purchase orders and update status information 24 hours a day.

Scalable and Flexible // The solution can be tailored to fit the unique needs of every company. Usage statistics reveal who is using the service and which functions are.

Getting to your data is easy, fast, secure, and reliable

Web based vendor portals

Ability to create web-based vendor portals for self service and order management functions, including:

View open RFQ's for price, delivery, and comments.

Provides balances for open purchase orders for vendors.

Automatically updates VISUAL PO lines and fields for review and internal approval within VISUAL.

Using Crystal as the reporting tool, generate reports for viewing and printing vendor performance.

Multi-level admin

User Administration allows you to manage the access of your customers and employees.

It's easy!

Ease of use, and the interface is easily customized for company's "look and feel."

Synergy Resources provides a collection of proven add-on applications and services for your VISUAL ERP.
